ADVANCED ELECTRONICS MANUFACTURING SERVICES

Our Services

- Serial PCBA (assembly of all types of PCB's)
- Rapid Prototyping, Pre-Production & Design assistance
- Smart global sourcing
- Post PCBA services
- Box Build & Sub Assemblies
- Electronics design services
- Manufacturability consulting
- X-Ray inspection service
- After-sales services

Technology & Capabilities

- SMT lines for mass production and prototyping
- Up to 01005, uBGA, fine pitch packages assembly
- Soldering in N2 reflow and Vapor Phase with Vacuum
- 3D SPI, 3D AOI, X-Ray inspection
- THT assembly (selective, wave & manual soldering)
- RoHS & REACH Compliant or Leadless processes
- Automated PCB cleaning
- Automated Coating with UV drying
- Laser engraving
- MSL Dry storage equipment and prebake
- Flying probe testing

Our Advantages

- Rapid quoting process – short lead time
- Quick and Flexible manufacturing
- From prototype to serial production
- Turnkey and consigned services
- IPC-610 Certified QA Inspectors and Operators
- Traceability and 8D report
